**Subject:** Re: Attached Image

Dear Mr Adkins:

I regret that I committed to something I could not do (provide copy of the recording used to assist the development of minutes for your review, comment, and revision). My apologies again, but we are not able to provide copy of the recording for the reasons I have previously provided. We have an established process of using minutes with review/comment/revision input by the participants documenting relevant discussion for use in fulfilling NIOSH's EEOICPA responsibilities. The minutes were never portrayed as being everything that was said (that would only be accomplished with a transcript approach). Yes, they are our interpretation of what was discussed as being relevant to our EEOICPA responsibilities. In this regard we want the minutes to be clear, concise, and accurate.

To that end, we would appreciate any comments or suggestions for revision of these minutes that you want to offer.

Sincerely yours,

Larry Elliott

Director

Office of Compensation Analysis and Support

NIOSH
