Raphael Moore
OCAW
Denver Colo.

Dear Raphael

I was sort of surprised to read in BNA about the views on compensation for sick workers with long term exposures to low level radiation (May 31, 79 edition).

Remember what I told you - even at the Pikeville AEDC/DOE Coadyear atomic plant they are "pulling the wool" over the unions eyes. Consider these facts re the medical picture

1) Feb 28, 79 OLD Dr Henson still "in charge" and still asleep at the Job.

2) The chief administrator had and has a 7th grade education with no self improvement (John Zellner) - totally intimidated

3) In March 79; Enter a new physician - who is also a lawyer He is a slick article W.T. Washam M.D.

4) My doctor (nameless) came in, told me many are sick but he is not permitted access - so he left.

5) March 12, 1979 an unmarked DOE whole body count
